FIRE, SMOKE AND ICE AT THE HALL LAST EVENING

There Was Little Damage, But There Was Much Running About.—They Broke the Door of a Room to Get in.

A fire broke out in Strathcona Hall last evening which for a few minutes caused a great deal of excitement among the residents. In the neighborhood of seven o'clock Charlie Legris, while on his way to visit one of the hall boarders, discovered smoke issuing from the key-hole of "A15's" kitchenette.

In stentorian notes his voice rang out the alarm and it was not long before most of the inhabitants were on the scene. Smith's mighty foot made short work of the door, and with great bravado the fire-fighters rushed upon the fearful blaze. After letting loose about 100,000 gallons of Montreal's "agua impura," the fire-fighters decided to desist.

It was found that the fire was caused by the electric wires.

When the Daily reporter left the scene Ayward and his associates were attempting to scoop up as much of the jell of water which covered practically the whole of the flat, as possible. It was stated later by one of the first floor residents that a skating party would be held to-morrow afternoon to which all would be cordially invited.

The Daily representative interviewed several of the first floor residents, but the editor of this sheet refuses to allow what they said to go into print.

The absence of one Mallory was keenly felt as his fire drill might have been of great use. A Royal Humane Society medal has been suggested for the hero of the hour, C. Legris, from parts unknown.

FRENCH CLUB FOR CONTESTS

Decide to Enter Oratory Competition.

J. HACKETT SPEAKS

Society to Consult University Authorities on French Comedy Project.

An unusually large attendance marked the first meeting of the French Club in the new year. After an excellent supper in the Grill Room of the Union, the president, Mr. Nicholson, introduced the guest of the evening, Mr. John Hackett. Mr. Nicholson referred in fitting terms to the debt all McGill men owe to Mr. Hackett, who was first president of the Students' Council. Since graduation Mr. Hackett has become, in the words of the chairman, "un des plus grands hommes du monde."

Mr. Hackett then expressed his pleasure at revisiting the Cercle Français, and at seeing that organization in such a flourishing condition. He spoke of the part that we at McGill can play in bringing together the two races and making a united Canada. Such a society is truly patriotic as well as educational. He paid a striking tribute to Mademoiselle Milhau, the "mother" of the Cercle, and a woman beloved by all those with whom she came in contact.

Professor Du Roure thanked Mr. Hackett for his presence and his words of encouragement, and then proceeded to explain to the members of the club the offer of the Alliance Française to donate two medals for public speaking in French, one for a contest among the French-Canadian members of the club, and another for the English-speaking.

The idea was favorably received and Messrs. Matthews, Elliott, Cohen, Ballantyne and Griffith signified their intention of entering the English-speaking contest, while several of the French members will take part in the other.

Mr. Nicholson then asked the opinion of the club on the holding of a French play, as has been done so successfully in former years. It was decided first of all to consult the University authorities, and if permission was granted to invite the co-operation of Mademoiselle Greterin and the ladies of the Societe Francaise. It was felt that a very successful comedy might be presented in this way.

THE ARCHAEOLOGISTS HEAR LECTURE

"Excavations in Asia Minor" Discussed by Prof. Robinson.

"Excavations in Asia Minor" formed the subject of a very illuminating address by Prof. Robinson, of Johns Hopkins University, in the Physics Building last night.

The lecture was suitably illustrated with stereopticon views, which added additional interest, owing to the fact that Professor Robinson has spent a considerable portion of the last five years in the east, seeking to unearth buried cities and other survivals of an ancient past that will serve to add much to the but small information that is at present available on the civilizations of a by-gone day.

It will be remembered that Professor Robinson occupies no mean position in the Archaeological world. He was formerly a member of the American council in charge of the School at Athens and has been vice-president of the Archaeological Institute of America.

A LONDONER'S TALE OF BOSTON.

Two old ladies, wandering about the Public Library building in Boston the other day, entered Bates Hall and gazed interestedly at a bust of Oliver Wendell Holmes in black bronze.

"Well," one lady remarked, very audibly, to the other one, "I never knew before that Dr. Holmes was a negro."

READING PRIZE.

In addition to the letter quoted in yesterday's Daily, Mr. Russell MacNaghten made the subsequent stipulation that the Reading Prize of Twenty-five dollars should be given in books.

THE EAST IN WESTERN ART

McGill Architecture Professor to Address Oriental Society.

The McGill Oriental Society will hold its fourth regular meeting on Tuesday, January 13th, at 8:30 p.m., in the Lecture Theatre of the Engineering Building, when Professor Ramsay Traquair, of the Department of Architecture, will lecture on the influence of the East in Western Art. The lecture will be illustrated.

Professor Traquair came to McGill from Edinburgh at the beginning of last session. He lectured for some time in the Edinburgh College of Architecture, where he did much important work in Byzantine architecture and in that of the Levant. He has been a student of the British School of Archaeology at Athens, and of the Byzantine Fund, connected with the former. Professor Traquair has published numerous papers on subjects pertaining to his department. His most important work was a volume on the Byzantine architecture of the Churches of Constantinople, to which he contributed all the designs and examples. He is an associate of the Royal Institute of British Architects.

The subject on which Professor Traquair will lecture to-night, is one which ought to attract a large number of students. How largely Western art has been influenced by Eastern thought and culture is known in a vague general way by most students. Professor Traquair will indicate in his lecture the particular lines along which this influence has travelled, and the form in which it has found most marked expression. The early civilization of Europe probably owes comparatively little to Eastern influence, but from time to time, waves have ebbed and flowed across the neck of land lying between the Canadian West and the Arabian Desert. Thus from the days of the Babylonian Empire, Eastern forms have been transferred to the West, and in turn Western forms have been given to Asia.

The process may in part be traced in the heroic art of Asia Minor, and in the Indian work at Gaudhara, and to some extent even in Chinese art. Professor Traquair will carry his survey to Mediaeval times, and will merely allude to the great influence of the East on certain of the minor arts.

McGILL SCIENCE GRADS RE-UNION

To Be Held for Ontario Residents at Toronto.

Arrangements have been made to hold a re-union of the graduates of the Faculty of Applied Science, residing in Ontario, at Toronto, on January 17th, 1914. This re-union is to take the form of a dinner, to be held at the Engineers' Club, 50 King street West, Toronto, at 7:30 p.m. on the above date.

Dean Adams, Professor C. H. McLeod, and Professor Nevil Norton Evans have promised to be present.

THE SCRAP-HEAP?

William Draper Lewis said of a squabble between two factions: "If they knew European history, they would not find these proposals so unprecedented. But they are ignorant. They are as ignorant of European history as Cornelius Hask was ignorant of European art."

Husk entered the National Gallery in Trafalgar Square one day. He watched a young student copying the faded Rokeby Venus; then he watched another young student copying a cracked Holbein; then he watched a third student copying a dim Raphael.

"Finally he bent over the easel of the last young man, and asked, 'Say, mister, what do you do with the old pictures when the new ones are finished?'"

OPENING OF CAMPUS RINK

Cold, Exhilarating Atmosphere Will Mean Good Ice.

FIFTY CENTS

Men to Use Hall, Ladies the Shack.—Fussers to Be on Hand.

The centre of attraction about college to-night will be the campus rink. Skating, good skating and lots of it, is the programme. How does this come about? Oh, the formal opening of the rink is to take place.

With the weather cold as it is, provided it doesn't rain or snow or do something in the ordinary, the ice surface will be in excellent condition. Those who have been at such skating parties before look forward with eagerness to the pleasant time that will be afforded. Those who expect to be there for the first time will find that much enjoyment may be derived from a skating party. This is one of the few occasions when the opportunity of meeting some of the fair co-eds is afforded the undergraduates.

Arrangements have been made so that the men may use their skates in Strathcona Hall. The ladies, as has been the custom in the past, will have the use of the shack.

Those who have season tickets for the rink will be admitted free of charge. The price for others will be fifty cents. The ladies will be admitted free. The trouble will commence at eight o'clock, when programmes may be filled.

COLLEGE PRESIDENT RESIGNS POSITION

Dr. Finley Receives Medal on Accepting New Position.

Dr. John H. Finley, who resigned his position as head of the City College of New York in order to accept the presidency of the New York State Board of Education, was presented Saturday with the National Institute of Social Sciences' medal in recognition of his achievements in social science and education. He was also notified that the league had endowed a "John Huston Finley" bed in the Washington Heights Hospital in perpetual allude to the great influence of the East on certain of the minor arts.

PROBABLE HEAVY FINE FOR LAZY STUDENTS

More Revenue and Fewer Undesirables Under This Plan.

A plan to increase by \$50 per year the tuition of backward students is being considered by the Cornell University faculty. In the last report of Professor Charles Hull, former dean of the college of arts and sciences, recommended that a student who has failed to pass his examinations in all his required work, and who is not so delinquent as to be dropped, should be called upon to pay extra tuition. Pointing out that in ten years \$57 students have come under the formal disapprobation of the faculty of the college on account of inferior scholarship, Professor Hull says that much time, energy and money is being wasted by the university upon such persons. Referring to his plan, he says that under it there would be more revenue and fewer undesirable students.

"If the university were to mark its disapproval of slothful students in a language understood by people, in money, it might find a change in the parental attitude, and, therefore, the youthful attitude towards work," he says.

A little boy who was very much puzzled over the theory of evolution questioned his mother thus: "Mamma, am I descended from a monkey?" "I don't know," the mother replied, "I never knew any of your father's people."

FIRST FORMAL MEETING OF ARCHITECTURAL SOC. TO-NIGHT

Yesterday afternoon a short informal meeting of the Junior Architectural Society was held in the Engineering Building. The subject of discussion was honorary membership. It was decided that those interesting themselves in the society, of which there are many ways, and yet are not eligible for active membership will be on consideration accepted as honorary members.

This evening will witness the first formal meeting of the society at 8 p.m., in the Architectural room.

The president, Mr. Walter Hyde,

will say a few words to the new members. This will be followed by a lecture from Prof. Nobbs, which is sure to be interesting as well as instructive.

It is unfortunate indeed for the Oriental Society that they are holding a meeting on the same evening, for, although Prof. Traquair is to address them his thoughts will naturally be with the welfare of the first formal meeting of the Architectural Society.

A large attendance is expected to hear Prof. Nobbs speak, among whom will be several of the junior draughtsmen in the city.

ROUND ABOUT THE COLLEGE

TO WHICH EVERYBODY IS A REPORTER.

A special meeting of the Union House Committee is called for 6 o'clock this afternoon.

Lost—A small suit case, containing a grey sweater and a red and white soccer shirt. Finder please return to the janitor of the Arts Building and oblige.

Rev. Dr. Herbert Symonds, Rector of Christ Church Cathedral, and well known as a student speaker, will address the meeting at Strathcona Hall on Sunday afternoon next.

Would all members of Rifle Club who have rifles, oil-bottles or pull-throughs return them at once to the janitor of the Arts Building, as the annual inspection is to take place soon and it is important that all rifles are returned.

McGill Seconds lost their game with the North Branch last Saturday night. The game was fast, and the struggle close. The final score was 25 to 23. McGill lineup: Parsons, Old, Montgomery, Seath and Berrault. At half time Montgomery went off and his place was taken by Ferguson.

COLLEGES EVERYWHERE

A Few Notes About What Students Are Doing in the Other Universities.

At the University of Illinois every class has its distinctive headgear.

The Senior Class at the Aggies recently had a hair cutting scrap with the Juniors and Sophomores.

Girls of the University of Kansas must learn to swim before they receive their diplomas.

Kansas recently voted against the adoption of the honor system with a 95 per cent majority.

The Y.M.C.A. at the University of Missouri sold some 10,000 Red Cross seals for a charitable institution.

The strict eligibility rule observed at the University of Louisiana caused many good men to be ruled out of the class games.

The Engineering Department of the University of Michigan, has conferred nearly 2,200 degrees since its establishment in 1860.

Students at the University of Missouri had the opportunity of seeing themselves in motion pictures, which were recently made on the campus.

Mr. Otto R. Armstrong, '13, who is now practicing law in El Paso, has been a visitor at the Phi Kappa Psi house for several days.

Many students were given try-outs by the Dramatic Club at the University of Michigan. From these the cast of this year's play will be selected.

The Woman's Dramatic Club at the University of Colorado presented a clever play, which is a dramatization of Van Dyke's story of a fourth magi. The show was a great success.

Students at Harvard earned \$34,723 while pursuing academic courses during the last year. The students acted in all sorts of capacities, from iceman to artist's model.

Michigan University during the last twelve years has sent more men to the upper and lower houses of the national congress than any other college in this respect. Virginia third, and Yale fourth.

A large percentage of woman college graduates are married. It is shown by statistics recently compiled by the National College of Education, that usually accredited in arguments against the higher education of women. Since the founding of that college, in 1892, 258 of the 1,113 graduates have been married.

Reading competition, Union, at 8.15 p. m.
Hockey, Arena, 5 p. m.
Gymnasium at Y.M.C.A., 5.15 p. m.
Delta Sigma, at R.V.C.
Thursday—
Economics Club, Joseph House, 8.30 p. m.
Basketball practice, 7.15 to 8 p. m.
Swimming Club, Y.M.C.A., 4.45 p. m.
Friday—
Hockey, Queen's at McGill.
Saturday—
Basketball, Queen's at McGill.
Gymnasium, 5.15 p. m., at Y.M.C.A.
Leaders' Corps, Y.M.C.A., after Gym. classes.

THINGS THEATRICAL

HIS MAJESTY'S.
A setting of Shakespeare is a fitting sequel to a season of grand opera. No better play could be chosen with which to commence such a week than "Twelfth Night." No better Viola could be found among the younger stars than Miss Anglin. Judging from last night's performance of "Twelfth Night" we may be led to expect as much, if not more, from the other plays of the talented young lady's repertoire.
All in all, it was quite as good a presentation of the comedy as has been seen here in many years. Miss Anglin herself, however, is doubtless the best Viola of this decade at least of other decades, who by the way, is herself responsible for the production, has found a particularly happy mean between the various kinds of settings in which Shakespeare has been presented. The result is an exquisite mounting—some of the scenes suggesting a futurist painting, presenting remarkable illusions of distance, and some suggesting rather the Ben Greet idea of draped and draped scenery. The setting in this piece suggests to a certain extent the Moorish and Miss Anglin prides herself on an Egyptian atmosphere. This would be simple enough in a pantomime, but in a play so decidedly English as "Twelfth Night" even if the stage directions do say the scene is laid in Illyria, the attempt is futile. Sir Toby Belch is only Falstaff not quite so comical, and Andrew Aguecheek is as English as Touchstone or as Dogberry.
A remarkable feature of this production is the remarkable resemblance of Sebastian (Max Fisher) to Viola (Margaret Anglin). In every performance of "Twelfth Night" that we have seen Viola and Sebastian were so unlike that the lines alluding to their remarkable resemblance to each other seemed ridiculous, but here on the contrary, the two resembled each other so remarkably that many were deceived by Sebastian on his first appearance—until he opened his mouth to speak.
Fidler Melish was Malvolio. There is no character in all Shakespeare so easily made ridiculous by an incompetent portrayal. Not so with that of Mr. Melish. It was a mastery bit of work, on a par with that of Milton Rosner.
Sidney Greenstreet as Sir Toby, Wallace Wilkerson as Sir Andrew, and Max Montrose as the Clown, kept the audience in good humor with their foolish yet we should think that their foolishness introduced was just a bit overdone. Still, as we said above, taken all in all, the company is more than competent, and should prove itself equal to the best in Shakespeare during the remainder of the week.
A. G.

WIND BREAKS AFFECT PRAIRIE CROP GROWTH

It has been estimated by Dr. Oscar Bernbeck, a German professor of agriculture, that a moderate wind, when blowing without obstruction, may lessen the yield of exposed land by more than half, by increased water transpiration and alteration of circulatory conditions. Judge Whiting, of Iowa, says that leeward protection with almost mathematical precision amounts to one rod on the windward side of each field in the protection of trees. As a result of scientific investigations made on the plains of the United States, Mr. C. G. Bates, of the United States Forest Service, concludes: "The efficiency of a wind-break in checking evaporation is proportional to its density. It may save as much as 70 per cent of the moisture ordinarily lost by evaporation, not only by checking the mechanical force of the wind, but because stagnation of the air in the lee permits the formation of a more or less complete blanket of humid air."

In Canada the prairie farmer realizes the value of shelter-belts of trees to break the force, and hence the drying effect, of the winds which sweep across the prairie, and over two and one-half million trees are annually distributed to the farmers for this purpose by the Dominion Forest Nursery Station at Indian Head. As density and height both influence the effectiveness of the wind-break, it should be made at least four rods wide, and the trees should be of a hardy growth should be chosen, such as the cottonwood or white willow, or, among the conifers, the so-called "evergreens," the white spruce, Scotch pine or tamarack. In theory, deep-rooted trees are better, for they should be chosen, but it has been found that soil is negligible, and the injury done close to the trees by shading can be avoided by growing three shade-enduring crops, such as corn or alfalfa. Three shelter-belts, four rods wide, one on the extreme western side of a quarter section, and the others at equal distances apart) will amount to only twelve acres, not more than sufficient to supply firewood, posts and poles for the farm. But, as Judge Whiting says, a strip of trees fifty feet high will protect the ground fifty rods to leeward, then three strips of this height on a quarter section of land will protect four rods wide, one on the extreme western side of a quarter section, and the others at equal distances apart) will amount to only twelve acres, not more than sufficient to supply firewood, posts and poles for the farm. But, as Judge Whiting says, a strip of trees fifty feet high will protect the ground fifty rods to leeward, then three strips of this height on a quarter section of land will protect four rods wide, one on the extreme western side of a quarter section, and the others at equal distances apart) will amount to only twelve acres, not more than sufficient to supply firewood, posts and poles for the farm. But, as Judge Whiting says, a strip of trees fifty feet high will protect the ground fifty rods to leeward, then three strips of this height on a quarter section of land will protect four rods wide, one on the extreme western side of a quarter section, and the others at equal distances apart) will amount to only twelve acres, not more than sufficient to supply firewood, posts and poles for the farm. But, as Judge Whiting says, a strip of trees fifty feet high will protect the ground fifty rods to leeward, then three strips of this height on a quarter section of land will protect four rods wide, one on the extreme western side of a quarter section, and the others at equal distances apart) will amount to only twelve acres, not more than sufficient to supply firewood, posts and poles for the farm. But, as Judge Whiting says, a strip of trees fifty feet high will protect the ground fifty rods to leeward, then three strips of this height on a quarter section of land will protect four rods wide, one on the extreme western side of a quarter section, and the others at equal distances apart) will amount to only twelve acres, not more than sufficient to supply firewood, posts and poles for the farm. But, as Judge Whiting says, a strip of trees fifty feet high will protect the ground fifty rods to leeward, then three strips of this height on a quarter section of land will protect four rods wide, one on the extreme western side of a quarter section, and the others at equal distances apart) will amount to only twelve acres, not more than sufficient to supply firewood, posts and poles for the farm. But, as Judge Whiting says, a strip of trees fifty feet high will protect the ground fifty rods to leeward, then three strips of this height on a quarter section of land will protect four rods wide, one on the extreme western side of a quarter section, and the others at equal distances apart) will amount to only twelve acres, not more than sufficient to supply firewood, posts and poles for the farm. But, as Judge Whiting says, a strip of trees fifty feet high will protect the ground fifty rods to leeward, then three strips of this height on a quarter section of land will protect four rods wide, one on the extreme western side of a quarter section, and the others at equal distances apart) will amount to only twelve acres, not more than sufficient to supply firewood, posts and poles for the farm. But, as Judge Whiting says, a strip of trees fifty feet high will protect the ground fifty rods to leeward, then three strips of this height on a quarter section of land will protect four rods wide, one on the extreme western side of a quarter section, and the others at equal distances apart) will amount to only twelve acres, not more than sufficient to supply firewood, posts and poles for the farm. But, as Judge Whiting says, a strip of trees fifty feet high will protect the ground fifty rods to leeward, then three strips of this height on a quarter section of land will protect four rods wide, one on the extreme western side of a quarter section, and the others at equal distances apart) will amount to only twelve acres, not more than sufficient to supply firewood, posts and poles for the farm. But, as Judge Whiting says, a strip of trees fifty feet high will protect the ground fifty rods to leeward, then three strips of this height on a quarter section of land will protect four rods wide, one on the extreme western side of a quarter section, and the others at equal distances apart) will amount to only twelve acres, not more than sufficient to supply firewood, posts and poles for the farm. But, as Judge Whiting says, a strip of trees fifty feet high will protect the ground fifty rods to leeward, then three strips of this height on a quarter section of land will protect four rods wide, one on the extreme western side of a quarter section, and the others at equal distances apart) will amount to only twelve acres, not more than sufficient to supply firewood, posts and poles for the farm. But, as Judge Whiting says, a strip of trees fifty feet high will protect the ground fifty rods to leeward, then three strips of this height on a quarter section of land will protect four rods wide, one on the extreme western side of a quarter section, and the others at equal distances apart) will amount to only twelve acres, not more than sufficient to supply firewood, posts and poles for the farm. But, as Judge Whiting says, a strip of trees fifty feet high will protect the ground fifty rods to leeward, then three strips of this height on a quarter section of land will protect four rods wide, one on the extreme western side of a quarter section, and the others at equal distances apart) will amount to only twelve acres, not more than sufficient to supply firewood, posts and poles for the farm. But, as Judge Whiting says, a strip of trees fifty feet high will protect the ground fifty rods to leeward, then three strips of this height on a quarter section of land will protect four rods wide, one on the extreme western side of a quarter section, and the others at equal distances apart) will amount to only twelve acres, not more than sufficient to supply firewood, posts and poles for the farm. But, as Judge Whiting says, a strip of trees fifty feet high will protect the ground fifty rods to leeward, then three strips of this height on a quarter section of land will protect four rods wide, one on the extreme western side of a quarter section, and the others at equal distances apart) will amount to only twelve acres, not more than sufficient to supply firewood, posts and poles for the farm. But, as Judge Whiting says, a strip of trees fifty feet high will protect the ground fifty rods to leeward, then three strips of this height on a quarter section of land will protect four rods wide, one on the extreme western side of a quarter section, and the others at equal distances apart) will amount to only twelve acres, not more than sufficient to supply firewood, posts and poles for the farm. But, as Judge Whiting says, a strip of trees fifty feet high will protect the ground fifty rods to leeward, then three strips of this height on a quarter section of land will protect four rods wide, one on the extreme western side of a quarter section, and the others at equal distances apart) will amount to only twelve acres, not more than sufficient to supply firewood, posts and poles for the farm. But, as Judge Whiting says, a strip of trees fifty feet high will protect the ground fifty rods to leeward, then three strips of this height on a quarter section of land will protect four rods wide, one on the extreme western side of a quarter section, and the others at equal distances apart) will amount to only twelve acres, not more than sufficient to supply firewood, posts and poles for the farm. But, as Judge Whiting says, a strip of trees fifty feet high will protect the ground fifty rods to leeward, then three strips of this height on a quarter section of land will protect four rods wide, one on the extreme western side of a quarter section, and the others at equal distances apart) will amount to only twelve acres, not more than sufficient to supply firewood, posts and poles for the farm. But, as Judge Whiting says, a strip of trees fifty feet high will protect the ground fifty rods to leeward, then three strips of this height on a quarter section of land will protect four rods wide, one on the extreme western side of a quarter section, and the others at equal distances apart) will amount to only twelve acres, not more than sufficient to supply firewood, posts and poles for the farm. But, as Judge Whiting says, a strip of trees fifty feet high will protect the ground fifty rods to leeward, then three strips of this height on a quarter section of land will protect four rods wide, one on the extreme western side of a quarter section, and the others at equal distances apart) will amount to only twelve acres, not more than sufficient to supply firewood, posts and poles for the farm. But, as Judge Whiting says, a strip of trees fifty feet high will protect the ground fifty rods to leeward, then three strips of this height on a quarter section of land will protect four rods wide, one on the extreme western side of a quarter section, and the others at equal distances apart) will amount to only twelve acres, not more than sufficient to supply firewood, posts and poles for the farm. But, as Judge Whiting says, a strip of trees fifty feet high will protect the ground fifty rods to leeward, then three strips of this height on a quarter section of land will protect four rods wide, one on the extreme western side of a quarter section, and the others at equal distances apart) will amount to only twelve acres, not more than sufficient to supply firewood, posts and poles for the farm. But, as Judge Whiting says, a strip of trees fifty feet high will protect the ground fifty rods to leeward, then three strips of this height on a quarter section of land will protect four rods wide, one on the extreme western side of a quarter section, and the others at equal distances apart) will amount to only twelve acres, not more than sufficient to supply firewood, posts and poles for the farm. But, as Judge Whiting says, a strip of trees fifty feet high will protect the ground fifty rods to leeward, then three strips of this height on a quarter section of land will protect four rods wide, one on the extreme western side of a quarter section, and the others at equal distances apart) will amount to only twelve acres, not more than sufficient to supply firewood, posts and poles for the farm. SKI-ING CLUB WAS ORGANIZED AT MEETING HELD YESTERDAY

Run to Be Held on January 17.—Jumping Competitions to Be Held.—Fee to Be Two Dollars.

A meeting of McGill skiers was called for five o'clock yesterday afternoon in Strathcona Hall, and shortly after the appointed hour those present, some twenty-five, were called to order. Mr. Eric Reddy then proceeded to put before the meeting a motion that a club be formed of McGill skiers and that it be affiliated with the Montreal Ski Club as a McGill branch of the above-mentioned club. This was carried.

Those at the meeting then proceeded with the election of officers. Mr. Norm. Williamson was chosen to fill the position of president and it was decided that no other officers were necessary, except a secretary, to which post Mr. Lee Strath was elected. Mr. Norm. Williamson then addressed

AT HOME AND ABROAD

A Few Sporting Items of More or Less Interest.

Henry, one of the High Schools goalkeepers, was into commission at the practice yesterday afternoon for a short while before Montgomery came out. He stopped a number of hard shots.

There will be a meeting of the Leaders' Corps of the McGill gym. classes after the work-out on Saturday.

There will be two senior sporting events this week. The hockey game on Friday and the Basketball game on Saturday, both of these contests are with Queens.

According to the "Queen's Journal," the Queens rink has been doing a good business since its opening on December 28th.

The "Varsity" says that the team are back again from their annual jaunt to the States, much improved in body, if not in mind.

Pete Campbell, of football fame, was prevented from taking part in all of the games of the U. of T. players in the States, owing to trouble in having a boil lanced.

Bill Laird is playing a great game for the Blue and White in the nets—he is said to be better than ever.

Varsity will have the services of a new man, Hastings, from Regina. He is fast and a good stick handler.

The Harvard gym. team will have a professional coach this year for the first time.

Vivian Nickalls, of England, has been engaged to coach the University of Pennsylvania crews.

Coach Yost, of Michigan, aided in preparing Army for the game in which they defeated Navy.

A cricket tournament will be played next spring with Pennsylvania, Harvard, McGill and the University of Toronto as the participants.

Laird, Knight and Hanley are likely to form Varsity's defence again this year.

"There promises to be a great crowd of supporters on hand to witness Varsity's first league victory this year." For once the "Varsity" had the result correct. We believe this was because McGill was not the opponent.

Coach Brooke, of the University of Pennsylvania, has 20 candidates out for winter practice. Four prizes have been offered for this work, one for the man showing the most improvement, another for the best punter, a third for the most capable drop kicker, and one for the strongest all-round player.

Fourteen candidates were out for the first time on the board running track at Colby Thursday for the Colby College relay team, which will run in the big B. A. A. meet.

The Keio University of Japan baseball nine will be welcomed in this country. Several Japanese college teams have visited this country in the past few years and have given very good exhibitions of our national game.

Pennsylvania football authorities are negotiating with the Annapolis academy authorities with a view to playing a football match next fall. Pennsylvania has decided to drop Brown from her schedule and the navy is sought to take the vacant place.

University of Pennsylvania has notified Manager G. V. Brown, of the B. A. A. games to be held in Mechanics Hall, Saturday, February 17th. It would not run a relay race against Georgetown University, as proposed. The Red and Blue will now be asked to run Dartmouth.

Tufts Varsity hockey team won an easy victory from the Amherst College seven in the Boston Arena Thursday night by a score of 11 to 1.

SWIMMING LESSONS TO BE GIVEN NOVICES

Classes Will Be Held on Tuesdays and Thursdays.

The first of the swimming classes organized for the benefit of those who wish to learn to swim, was held yesterday. P. H. Kendall, of the Central Y. M. C. A., has been secured to give instruction. Classes will be held every Tuesday and Thursday at 4.45 p.m.

HOCKEY.

The executive of the Hockey Club have arranged for a game to be played on January 31st, in Boston. Harvard are to be the opposing team.

McGILL TEAM TO MEET THE VICS. WEDNESDAY

Practice Game to Be Played at Arena.—Not Open to Public.

The hockey executive have arranged to play a practice game with the Victorias, of the City Hockey League, at the Arena, from 5 to 6 on Wednesday. The Victorias have won all their games to date, so they should give McGill a hard run. The game will take the place of the regular practice. A list of players requested to be on hand will be published in to-morrow's Daily. The Arena will not be open to spectators, so that it will not be to anyone's advantage to take the trip to Westmont in hopes of seeing the Red and White's stalwarts in action.

INTERFACULTY ASSAULT-AT-ARMS WILL BE HELD ON JANUARY 31

Prizes Will Be Awarded to Winners of Boxing and Wrestling Bouts.—Teams Will Be Chosen From Standing of Competitors.

The Interfaculty Assault-at-Arms will be held in the Union on Saturday evening, January 31st.

Competitions will be held in both boxing and wrestling, at the usual weights of 115 lbs., 125 lbs., 135 lbs., 145 lbs., 155 lbs., heavyweight, and prizes, probably watch-fobs, will be awarded to the winners in the different events, together with the championship of the college at that weight. The teams for the various outside meets will be chosen provisionally from the results of these competitions, but anyone has the right to challenge any man chosen for a team after giving two or three days' notice to an officer of the club, and a time and an official referee will be chosen for the boxing or wrestling bout which is to decide the man that is to be placed on the team.

Students who propose attending classes are reminded that there is little more than two weeks for getting into shape. The instructors are good, all men attending classes can get all the exercise they want, and there is nothing at all to stop any student from participating.

HOCKEY RESERVATIONS.

Those who have made reservations for the hockey season will please call at the Students' Council office for tickets to the Queens game.

THE REVISED HOCKEY SCHEDULE ANNOUNCED

McGill Seconds at Most Have But Three Games to Play.

The following is the correct schedule of games in the Intercollegiate Hockey series. The previous list was unfortunately wrong in several places.

SENIOR SERIES.
Jan. 16—Queen's at McGill.
23—McGill at Toronto.
30—Toronto at Queen's.
Feb. 6—Queen's at Toronto.
13—Toronto at McGill.
20—McGill at Queen's.
INTERMEDIATE SERIES.
Group A—McGill II.
Group B—R. M. C. vs. Queen's, a winner to be declared before Jan. 23, 1914.
Group C—Toronto II; McMaster and Trinity, a winner to be declared by Feb. 6th.
Group D—Winner of A and B play home and home games by Feb. 6.
If A wins out then a final sudden death game to be played with C in Kingston. If B wins then home and home games to be played with winners of C.

HOCKEY TIME TABLE HAS BEEN AMENDED

There Are Still Some Classes Who Have Not Arranged Hours.

A corrected list of class hockey was given out yesterday afternoon and is as follows:

Monday—
1—2 Arts '15.
2—4 Arts '17.
7—8 Sci. '15.
8—10 Univ. Settlement.
Tuesday—
12—1 Sci. '14.
7—8 Arts '16.
8—9 Sci. '14.
9—10 Arch.
Wednesday—
1—2 Med. '17.
2—3 Sci. '16.
2—4 Sci. '17.
8—10 West End Boys' Club.
Thursday—
1—2 Arts '14.
7—8 Law.
8—9 Sci. '15.
9—10 Arts '15.
Friday—
12—1 Sci. '14.
1—2 Med. '17.
2—4 Arts '17.
7—8 Sci. '16.
8—9 Sci. '17.
9—10 Arch.
Saturday—
11—12 Law.
12—1 Arts '16.
There are a number of classes who have not arranged for hours. The executive are anxious to have these arranged as soon as possible. Every day the ice is well patronized by hockey players in spite of bad weather conditions and the prospects for very exciting class games is very bright. The management expect to be able to announce a schedule shortly as soon as all the classes have been allotted ice.

SENIORS WERE IN FAST WORKOUT AT THE ARENA YESTERDAY AFTERNOON

Second to Last Practice Showed a Few Weak Points.—Lack of Combination.

DEFENCE IS STRONG, FORWARD LINE FAST

Play a Little Rough.—Two Casualties.—Team to Meet Vics. on Wednesday.—Men Are in Good Condition.

The senior squad were out in full force at the Arena yesterday afternoon. It was the second to last practice they will have before their opening fixture against Queens this Friday. The ice was in first rate condition, the advent of the cold weather being very welcome to the management of the Arena. Everybody seemed to realize the importance of the practice, and a very fast pace was maintained throughout the hour.

At times the players seemed rather inclined to mix things up, but every one took the knocks in good faith, and no very serious damage was done. Parsons was hurt, but continued after a few moments. Not so Hooper. Although his injury was far from serious, it was thought better that he should not continue. He will be out again Wednesday none the worse for the little rest.

The weeding-out process is becoming easier every day. There is still, however, no definite team picked. All the men seem to have gotten into good physical condition, but there is much hockey knowledge yet to be learned. The absence of head work is marked. The men, owing no doubt, to the fact that they have had little team practice as yet, do not fit into each other's style of play.

The forwards have not been doing much passing, and when they do their passes do not seem to go to the right man. The men are also inclined to overtake the puck and to pass forward.

The latter facts have no doubt decided the executive to replace the regular practice with the Victorias, of the City Hockey League. In this way they will be much better prepared for the blowing of the whistle next Friday.

Whether or no the lack of the usual holiday trip to the States will prove a stumbling block to our men is as yet a matter of doubt. The team on paper makes an outlook which is altogether bright, but until they come up against a team of equal merit the matter will still be all conjecture. Be this said, however, the management and the individual members of the team are spurring no efforts to prepare themselves for the struggle.

Very little has been divulged as to Queens relative strength, but the tricolor always have a very fast, well-conditioned appetite to take the ice. They have been practicing for a couple of months, including gym work and a trip to the States, and are in the very pink of physical condition.

After a short preliminary rag the players were formed into teams. The team on the hard ones, Monty is strong defence playing with the weaker forwards, and vice-versa. Montgomery, Rankin and Hughes formed one defence, Mann, Gilmore and Kendall, who was later replaced by Ross, another. There was little to choose between Monty and Mann.

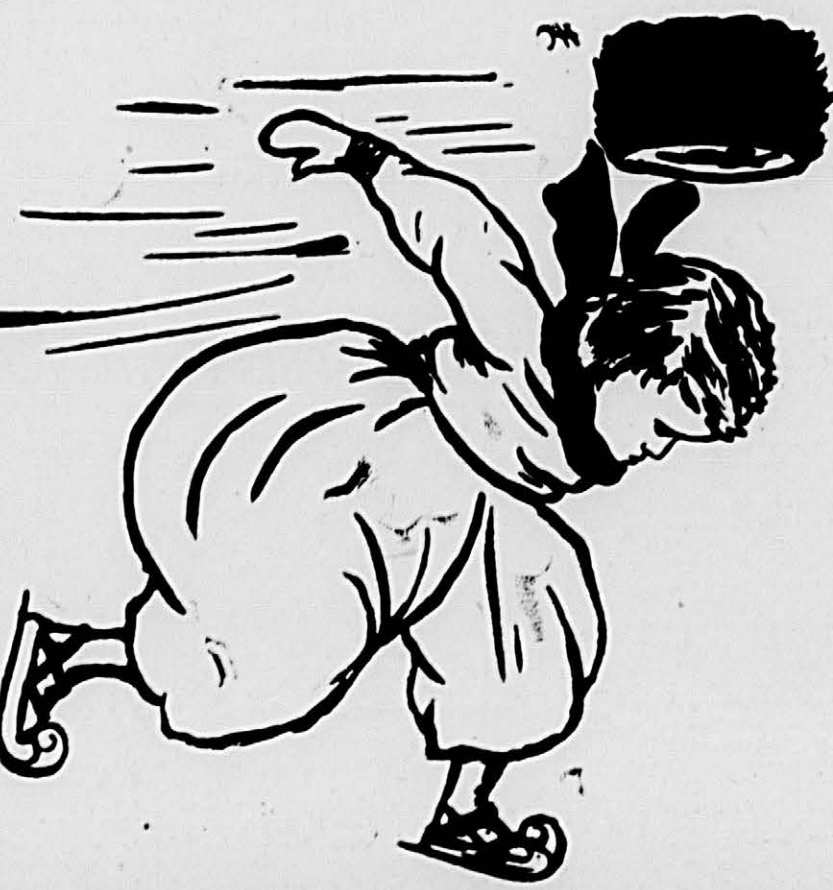

Both played stellar games and had lots of work to do. They are both inclined to let the easy ones slip by their sticks, but he is a pretty good shot who fools them on the hard ones. Monty is not over careful in his clearing. Hughes and Rankin, the Red and White's defence of last season, worked well together. Very little got by that watchful pair. Captain Bill is in great condition, and was back to his old rushes. He worried the opposing defence considerably, and proved a stone wall not to be pierced by the forwards. Rankin while not doing much rushing, prevented a good many likely scores. He is better than ever this year. Gilmore, Kendall and Ross, though not quite of senior calibre, would put up splendid games if they could be called into Friday's encounter. Gilmore, especially, was to be noted. He followed Hughes' example and more than once carried the puck almost to his opponents' net.

Parsons and Hooper shared the honors as forwards. Both are very fast, and very good stick handlers. Parsons is a very tricky little player, and what he lacks in weight he makes up for in speed and art. The heavier men were made to look foolish several times by the body checks he administered. Hooper gave a fine exhibition of hockey until he was forced to retire. He plays right wing and has a very wicked shot. Being fast his checking back was effective.

Davidson made his initial appearance at the Arena. He has been out before on the campus rink. At the beginning of the practice he was inclined to be rather selfish, but later developed a quick, but not over accurate pass. He played on McGill's seniors two years ago and should prove a great strength to the forward division. The other likely candidate for the advance line is De Muth, of last year's Intermediates. He is not as fast as the others, nor as clever a stick handler, but he has a very dangerous shot. He knows the boards and can use them to advantage. In this particular his weight stands him in good stead. Wickson would appear to be a much more valuable addition, but he is used to playing in the centre ice. His play was consistent throughout. Macdonald, a lower province man, was out for the first time. He showed breaks of speed and should have little difficulty finding a place on the seconds.

Fraser, Rainboth, Morris, L. E. Smith and Brophy alternated. All are fast and McGill should not be lacking in good substitutes and second string men. There will be no practice to-day, but a list of those expected to be on hand for Wednesday's practice game will be published to-morrow. The following men were at the practice yesterday:—Hooper, Rainboth, Rankin, De Muth, Gilmore, Fraser, Brophy, Ross, Kendall, Hughes, L. E. Smith, Mann, Parsons, Davidson, Macdonald, Montgomery, Morris, Wickson.

THE SALE OF TICKETS FOR THE QUEENS GAME

Those Who Apply Soonest at Students' Council Will Obtain Best Seats.—Sale Opens Today.

The ticket sale for the Queens game opens to-day. It was announced from the Students' Council offices yesterday that as the best seats will be given to the earliest applicants, those who want to have a good view of the game will find it to their advantage to call at the Council's offices in the Union as soon as possible.

The boxes and the reserved seats will be disposed of at the Union, while the rush seats must be obtained at the Arena on the night of the game. Boxes are to be sold for \$6.00, and reserved seats for seventy-five cents each.

There are 60 boxes, arrayed along each side of the Arena. The boxes those on the West End, will be sold to the graduates, and those on the East to students. The rush seats are behind the goals to the north.

COLUMBIA DEFEATS CORNELL FIVE

New Yorkers Outplay Cornell in Fast Game.

In one of the most interesting games of the basketball season so far, the Columbia University five defeated the Cornell team by a score of 19 to 17 in the Columbia gym last night. The game was a surprise to many, who believed that the Ithacans stood a much better chance of winning and were in decidedly better form than the Blue and White men. Besides this, Columbia had not shown up very well in the preliminary season. The strict training and thorough handling of Coach Fisher were exhibited to advantage, for a remarkable improvement was made over the work of the past preliminary games. The game was for both teams the first of the intercollegiate championship series, and with several of last year's team back the Cornell supporters were confident of success.

The contest was marked throughout by clean, snappy playing. Both teams were in good form.

INT. HOCKEY LEAGUE STARTED IN 1903

Toronto and Queen's Have Each Been Champions Four Times.—McGill Three.

This is the twelfth season of intercollegiate hockey. In that period Toronto and Queens have each won the championship four times. McGill has come out ahead three years. The dates and winners are:

1903 McGill.
1904 Queens.
1905 McGill.
1906 Queens.
1907 Toronto.
1908 Toronto.
1909 Queens.
1910 Queens.
1911 Toronto.
1912 McGill.
1913 Toronto.

HOWARD TO BE SCENE OF FENCING PRELIMS.

March 21st is the Date.—Finals to Be Held in New York.

The northern division of the Intercollegiate Fencing Association, including Harvard, Yale, Cornell, and Bowdoin, will hold the preliminary match in the Hemenway Gymnasium, Harvard, on the afternoon and evening of Saturday, March 21. About the same time, the southern division will hold its preliminary round, and two weeks later the Intercollegiate finals will be held in New York. There are four colleges represented in each of the two divisions, and after the elimination of one college from each, there will be six teams to compete for the championship.

INSTRUCTION IN ART OF SWIMMING

Classes Arranged Under Y. M. C. A. Swimming Instructor.

Swimming is a branch of athletics not encouraged at McGill as it should be. There are doubtless a large number of students who cannot swim but would be glad of the opportunity to learn if proper instruction could be given them.

Such an opportunity is now available. Arrangements have been made with Mr. Kendall, swimming instructor of the Central Y. M. C. A. to give instruction in swimming on Mondays and Wednesdays at 4.45.

These classes are open to non-swimmers as well as those men who can already swim, but desire to improve their stroke. Mr. Kendall teaches the "Australian Crawl," and as he has made quite a reputation for himself as a swimming instructor, everyone should take advantage of this opportunity. A charge of \$1.50 for six lessons will be made, either one or two lessons per week may be taken. Those wishing to take these lessons should be present at the Y. M. C. A. tank this afternoon at 4.45.

Oh, I See—A physician was driving through a village when he saw a man amusing a crowd with the antics of his trick dog. The doctor pulled up and said: "My dear man, how do you manage to train your dog that way? I can't teach mine a single trick."

The man glanced up with a simple rustic look and replied: "Well, you see, it's this way: you have to know more'n the dog or you can't learn him nothin'."

"I use Baby's Own Soap every day and my skin is delightfully soft, white and smooth, and my complexion is beautifully clear."

It is impossible to make a better soap than

"Baby's Own"

But get "Baby's Own" and do not accept any soap that only resembles it and which is made as cheaply as possible to look as nearly like "Baby's Own" as the law permits.

SUGGESTIONS

A friend sends the Daily a suggestion anent the formation of a new department. We for some time have wished to add the special feature R. C. D. mentions, and if he will obtain the assistance of some half dozen of his friends, we shall be delighted to place him in entire charge of the projected department. If he is unable to take the responsibility of carrying the idea into successful operation, it must wait in abeyance until somebody else who suggests it is willing to take it up. Meanwhile we are always glad to receive new suggestions, some of which, it will be seen, we have been able to act upon.

SKI CLUB

Clubs! Clubs! Clubs! and yet another of them.

This time, we are not entering into a discussion as to the advisability of the formation of more organizations at McGill for the simple reason that we consider the establishment of a McGill branch of the Montreal Ski Club a very commendable step.

It is rather strange on the face of things that such an organization has not come into existence before this, but we do not intend to discuss that either. That would not be getting us anywhere.

Ski-ing has become a very popular sport in Canada, and is fast tending to establish itself on a firm footing at McGill. This fact is demonstrated by the contest contemplated with Dartmouth.

The club is certain to attract a large membership, for it will not only afford opportunity for recreation of the best sort, but will serve to promote good fellowship with the co-eds.

ATHEISM IN COLLEGE

At a certain period in every thinking young man's life, he begins to ask the "reason why." This is a natural sign of thoughtfulness. The erroneous idea goes forth that the majority of college men are atheists and disbelievers. It is only the desire to be more firmly convinced. A man that never doubts never believes. New problems have to be mastered, and the perplexed seeker after truth receives not an assist, but a kick from the ignorant outside world.—The Hustler.

ALUMNI COLUMN

We would like to remind our readers that our Alumni Column will appear every Saturday morning. To make this the attractive feature that it should be, would be practically impossible did we have to attend to the matter altogether. But with your co-operation we feel that such a column can be made increasingly interesting from week to week.

Are your graduate friends making names for themselves since they left college; are they actively engaged in some definite occupation; are they on the retired list? No matter where they are or what they are doing, let us know about them.

If we do not derive our information from you, outside of some very sparse reports which have come to hand, we know nothing of the men and women who once passed through the halls of McGill. Especially is this true of graduates of some few years' standing.

McGill Twenty-Four Months Ago

From the McGill Daily of Saturday, January 13, 1912.

The officers of the Liberal party are: Leader, Hon. A. M. Huggesson, M.P.; chairman of the caucus, Hon. B. French, M.P.; chief whip, Hon. Arthur Mathewson, M.P.; assistant whip, Harold Griffith, Esq., M.P.; treasurer, Guy Fisher, Esq., M.P.; secretary, Hugh Griffith, Esq., M.P.; daily representative, K. H. McCrimmon, Esq., M.P.; science representative, A. Warburton, Esq., M.P.; medicine representative, T. W. Sutherland. Of these the first three only were members of last year's Liberal Government, most of the others having been whips.

The Socialist organization is at present in a position to state its programme, which the party intends to advocate with all the vigor at the command of its adherents.

The McGill Swimming Club has decided upon its programme for the rest of the season. On Thursday, January 16, the Annual Interclass meet will be held at the M.A.A.A. baths.

A very interesting lecture on the war in Tripoli was given before the members of the Military Course, Col. English, who gave the lecture first outlined the general attitude of both sides before the war.

The American tour has been definitely arranged to start January 21. Details will be announced later. The programme of games will include N.Y.A.C., Yale, Columbia and W. E. Y.M.C.A. in New York. A polo team will not be taken.

Dr. Adams will not leave McGill. Such were the glad tidings received late last night. Everyone connected with the University will rejoice that a man of such brilliance will not depart as have so many distinguished professors before him, in search of new worlds to conquer.

Leader of The Oxford Movement Toward Rome

Reader Before the Historical Club Says Cardinal Newman Was a Chosen Vessel and That He Felt the Call to Raise His Countrymen to Higher Understanding.

John Henry Newman, first vicar of the Church of England, later Cardinal in the Church of Rome, was discussed in an interesting address before the Historical Club at its last meeting, by E. A. Lindsay.

R. H. Hutton in his book entitled, "Cardinal Newman" introduces his subject in the following words:—"It is a strange . . . and calmly ignored all its prepossessions."

While it is my purpose to not be too biographical in this paper on Newman, it is quite necessary that the fundamental characteristics of his life from his youth up should be looked at in order to understand fully the significance of the many events of his varied life and the mark which he has left on English history and religious opinions.

Newman was born on February 21st, 1801, in the city of London, the son of a banker supposedly of Dutch descent. His mother, was of a Huguenot family who had long lived in London as engravers and paper manufacturers.

He began his school course at Ealing under Dr. Nicholas at the age of seven and from this time began to show certain signs of more than ordinary ability. He himself tells us that he was "very superstitious" in his early years. At this time he was definitely under the evangelical and Calvinistic influence of his Huguenot mother, and already a careful student of the Bible. In 1816 he had an influence brought in upon his life which was never to be effaced and originating in his conversion, this remained very real to him in his after life and his many references to this personal revelation of the Godhead to him was so real to him that it seemed to remain the working basis under all difficulties. It was about this time that he began to feel the need of a definite creed and impressions of dogma which were to be the characteristic battle grounds of his career.

He went into residence at Trinity College, Oxford, in 1816, that is when he had not yet reached his sixteenth year and graduated in 1821. Desiring further work at Oxford he read for a fellowship at Oriel and was elected in 1822. It is interesting to note that in the following year Pusey was elected a fellow of the same college, marking the first real contact of these two leaders of the Oxford Movement.

He was ordained in 1824 and later held such offices as vice-principal of St. Alban's Hall, tutor at Oriel, etc. In the year 1826 he formed the acquaintance of R. H. Fronde, brother of the historian, who was destined to play a very great part in Newman's development and history. These two new tutors at Oriel formed a very high conception of their office, as being more pastoral than secular and here we see the mutual influence of these two companions.

In 1827 Newman was appointed vicar of St. Mary's and although still nominally associated with the evangelical party his ecclesiastical views were gradually assuming a higher tone. This advanced views finally forced his severance with the Church Missionary Society and the Bible Society and marks his final breach with the Low church party.

In 1832 in company with Fronde he made a trip to Europe visiting Rome which he termed "the most wonderful place on earth" but the Roman Catholic religion he called "polytheistic, degrading and idolatrous."

In 1833 began the famous "Tracts for the Times," shortly after a sermon preached by Keble, which has been called the inauguration of the Oxford Movement, in which Newman advanced the idea of definite discipline and doctrine in view of possible disestablishment of the church, a subject meditated upon by High Churchmen in view of the action of the state with the established church of Ireland. Newman supplemented his tracts by Sunday afternoon sermons in St. Mary's and it was through these sermons that his marked influence over young men was seen. Pusey joined the movement in 1835 emphasizing the ritualistic side of the new movement. These and his lectures on the via Media of the C. of E. but Rome and Non-Conformity, depending the 39 articles as being not directed against the R. C. Church, but against the errors and exaggerations of the same. It was practically the move of the Archbishop of Canterbury in requesting Newman to cease his Tracts that finally caused his breach with the C. of E. He expressed himself at this time as being "in his death bed as regards membership of the Anglican Church."

In 1843 he published an anonymous retraction of all the hard things he had said against Rome and in the same year preached his final sermon on the C. of E. and resigned St. Mary's. In 1848, he was received into the R. C. Church, ordained in 1846 and given the degree of D.D. and returned to England, where he spent practically 40 years undertaking some university work and working with his followers in writing the lives of the English Saints. If there is one thing more than another of the great Cardinal's character that must stamp him as a very great man, it is the fact that while he apprehended obstacles which Kean theology must grapple with, he realized that these were not insurmountable and also that the difficulties of one's own conscience were even more difficult and that his main object was to live for that inspired ideal which he had conceived of, that all pride, prejudice and error must fall before his great struggle to attain to what he conceived as the nearest, best

suits of the great movement we can form some conception of the power of the man!

Newman was a man with one single purpose in life, upon which all his power was concentrated. That the church should establish its doctrine and dogmas clearly, that she should establish her authority as independent of the state and that she should justify herself as that medium through which the sacraments were to be ministered with authority and grace and that she should in every respect continue the Catholic principles which were her inheritance. Newman went over into the Church of Rome as a result of personal conviction. He had been seeking truth and what he conceived as the lawful authority of the church, he had endeavored to make his own church realize that she was not exercising her right, and as he was delving into these mysteries he felt that "enormous gloom," that uncertainty of which he wrote of on crossing the Mediterranean. He had sacrificed his power to take up literary work, he had shown true greatness for the cause, which he had taken up led him into many great difficulties. He was estranged from many of his fellow churchmen and yet felt constrained to fight for every principle which he conceived to be right. His action in leaving the Anglican Church brought a feeling of indignation against him, but in spite of all he was and must be revered by all who conceive that fidelity to a cause is an ideal is the true type of greatness.

As the Oxford Movement left as a result of its advent an emphatic love for beauty, a mysticism that bred a greater spiritualism in men, a faith which covered those things which are too deep for reason; so Newman by breaking down the narrow barriers of the church constructed within the Church of England that breadth of opinion that toleration of spirit which has made her the "via media" between the R. C. Church on the one hand and the non-conformist churches on the other, and has opened up to Protestant eyes to see that within the Church of Rome all is not evil but that there are many elements therein which they might well emulate, and has shown that truth and fidelity to conviction which is the mark of true greatness in any calling.

Not only has Newman and his followers aroused a new and living spirit in the church but he has also contributed some of the most beautifully spiritual poetical works in the language. He had a power of writing with force and pointedness with that tinge of irony which shows force of purpose and strong conviction without offending or becoming angry.

Because of his style he has left a strong impression upon literature, because of his earnestness and piety, a deep impression upon religion.

Newman entered the Church of Rome accepting the doctrines thereof willingly and in reality many of them he had already accepted in addition to those of the Church of England. Those which he did not accept until entering the Church of Rome and for which he had seen no reason, he now accepted as being right in virtue of the fact that they were ordained and made part of Roman Canon law by that church which he believed was the only true manifestation of Christianity. On the death of Pope IX. in 1878 Leo XIII succeeded to the Pontificate and in 1879 honored his Pontificate by naming Newman as a Prince of the Church and presenting him with the cardinal hat. Newman died at Edgbaston Rectory on 11th August, 1890 and was buried at Rednal by Father Ambrose St. John, his personal friend.

Page 250, Hutton:—"The sentiments of those amongst whom he had lived and the feeling of reverence for so great a man are

WEBSTER'S NEW INTERNATIONAL - THE MERRIAM WEBSTER

Every day in your talk and reading, on the street car, in the office, shop, and school some new question is sure to come up. You seek quick, accurate, encyclopedic, up-to-date information.

This NEW CREATION will answer all your questions with final authority. 400,000 Words Defined. 2700 Definitions. 6000 Illustrations. Cost \$4.00. The only dictionary with the new divided page. A "Stroke of Genius."

Write for specifications, etc. Mention this publication and receive a free color pocket map.

G. & C. MERRIAM CO., Springfield, Mass. U.S.A.

evidenced by Hutton in the last paragraph of his book:—

Ever since he was a child he was opposed to "Liberalism in Religion," i.e. one creed being as good as another, but he had ever followed a dogmatic Christianity springing from a revealed doctrine, and developed organically and providentially from that original germ. He makes no excuse for his action in life but uses these words:—

CORRESPONDENCE

To My Dear Friend

An Inexperienced Woman:

What was my grief and despair to find, upon reading yesterday's Daily, that one who evidently has been so highly educated, could imagine for a moment that the members of the "Cercle Francaise" would or could undertake such a great and noble work as the presentation of a play or similar entertainment without the direction and management of woman.

While not speaking officially, it seems to me a preposterous idea that the supers—I refer to the men—who were perhaps a factor—but oh! how small a one—in the remarkable success of the comedy given last year by the R. V. C. young ladies; should now launch out into a similar undertaking with only a few almost totally inexperienced males and certainly to a unit until when such a galaxy of stars are evidently waiting close by,

only too ready to assist their willing and unlightened compatriots.

How could a man charm a large audience with his winsome grace, his sweet attractiveness, and his charming personality, while at every step his number nine boots were threatening to precipitate disaster by caving in the stage. The only conceivable result of such daring would be a hurry call to the successor of Peters to shift the chairs so that the occupants might gaze upon the fair students in the gallery, who could scarce keep their faces composed enough to suit the gravity of the situation. But enough! Surely my point is clear.

It is only necessary to add that even the talent of last year's actresses could not have been so advantageously displayed had it not been for the heroic efforts of a certain French lady, a permanent resident of the R. V. C., and to conclude—since I also gained by that instruction—by signing myself

A VERY MUCH EXPERIENCED MAN.
